## Monthly Notifications Register

Notifications registered at CCMC from 2015-11-01 to 2015-11-30

Sector A : SERVICES

Register issued on : 2015-12-04

**Subsector A01: TOURIST SERVICES**

**Subsector :** A01 Registration Date : 2015-11-10  
**Organization :** AENOR  
**Country :** Spain Latest Date for Comments : 2015-12-20  
**Project ID :** P0043437/0002 Draft for public enquiry  
**ICS :**  
**National Ref :** PNE 178501  
**Title :** Management system of smart tourist destinations. Requirements  
**Scope :** This standard establishes a management system to provide the tourist destination with a useful tool to determine the intelligence of a destination.  
 The adoption of a management system of a Smart Tourist Destination is a strategic decision affecting the destination and the responsible body of the destination. The implementation of the management system is influenced by varying needs, objectives, products, services provided, processes and organizational structure.  
 The standard will provide with a methodology to manage integrally a smart tourist destinations with a focus on continuous improvement and enhancement of resources and geographical space.  
 This standard would apply to the managing body of the destination, usually the City, without detriment to other organizations with delegated responsibilities, or who can assume the responsibilities in this area (eg., Council, Government, Ministry, council, etc.)  
 The model has its basis on the draft Intelligent Tourism Destination, developed on behalf by the Ministry of Tourism, as established in the National Tourism Plan (PNIT) 2012-2015 approved by the Government of Spain in June 2012, where the following definition of Smart Tourist Destination is approved:  
 An innovative tourist destination consolidated on cutting edge technology that ensures the sustainable development of the territory, facilitates innovative tourist visitor interaction and integration with the environment, and increases the quality of the visitor's experience at the destination.

**ICS :**  
**National Ref :** SRPS H.C8.992:2015  
**Title :** Standard Test Method for Volatile Content of Coatings  
**Scope :** This test method describes a procedure for the determination of the weight percent volatile  
content of solventborne and waterborne coatings. Test specimens are heated at 110 ± 5°C  
for 60 min. The coatings used in these round-robin studies represented air-dried, air-dried  
oxidizing, heat-cured baking systems, and also included multicomponent paint systems. Sixty  
minutes at 110 ± 5°C is a general purpose test method based on the precision obtained with  
both solventborne and waterborne coatings. This test method is viable for coatings wherein  
one or more parts may, at ambient conditions, contain liquid coreactants that are volatile  
until a chemical reaction has occurred with another component of the multi-package  
system.

### Subsector I26: PLAIN BEARINGS

---

**Subsector :** I26 **Registration Date :** 2015-11-20  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00026636/0001 **Project**  
**Established**  
**ICS :** 17.040.20  
**National Ref :** ÖNORM M 8128  
**Title :** Tribotechnique - Testing of lubricants- R0F/R0F+ rolling bearing grease-test rig  
**Scope :** The ÖNORM is applicable for rolling bearing greases, those are especially manufactured greases according the NLGI classes 1 to 3 and DIN 51518 to lubricate rolling bearings. To lubricate rolling bearings especially greases K as per DIN 51825 are the proper one. The R0F test is used for determination of the grease service life and the upper limit of temperature in use of rolling bearing greases at high speed and moderate thrust and radial loads. Two variants of tests are possible, R0F and R0F+.
